Assignment 15

Automata & Theory of Computation

Student ID: 2018 40 3240

Name: 244

1. Construct an npda that accepts the language generated by a grammar with productions

 $S \rightarrow aSSSab|\lambda$.

$$S \to aSSSA | \lambda \qquad \delta(\mathcal{Z}_{0}, \lambda, \pm) = [(\mathcal{Z}_{1}, S_{2})]$$

$$A \to aB \qquad \qquad \delta(\mathcal{Z}_{1}, a, S) = [(\mathcal{Z}_{1}, SSSA)]$$

$$\delta(\mathcal{Z}_{1}, a, A) = [(\mathcal{Z}_{1}, B)]$$

$$\delta(\mathcal{Z}_{1}, a, A) = [(\mathcal{Z}_{1}, B)]$$

$$\delta(\mathcal{Z}_{1}, b, B) = [(\mathcal{Z}_{1}, A)]$$

$$\delta(\mathcal{Z}_{1}, b, B) = [(\mathcal{Z}_{2}, A)]$$

2. Construct a context-free grammar for the language accepted by the npda $M=(\big\{q_0,q_1\big\},\{a,b\},\{A,z\},\delta,q_0,z,\big\{q_1\big\}), \text{ with transitions}$

$$\delta(q_0, a, z) = \{ (q_0, Az) \},\$$

 $\delta(q_0, b, A) = \{ (q_0, AA) \},\$
 $\delta(q_0, a, A) = \{ (q_1, \lambda) \}.$

A->bAA/a
